**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 7-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ronci et al. in view of King et al.

There is disclosed in Ronci a frying device comprising: a vat 78 containing a volume of oil; a drive mechanism 22 including a guide bracket 20 connected to one side of the vat; a food compartment 38 connected to the drive mechanism and supported by the guide bracket; and a motor 70 connected to the food compartment.

King discloses the use of plural food containers mounted in a food compartment for placement within an oil vat.

It would have been obvious to one skilled in the art to provide the device of Ronci with plural food containers as taught by King, in order to cook different types of foods all at one time without mixing the food items together.

Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art as applied to claim 1 above, and further in view of Nett.

Nett discloses a circulation line in connection with a cooking vat, the circulation line including a filter 16, a pump 19 and a heater 13, 25.

Art Unit: 1761

It would have been obvious to one skilled in the art to provide the device of Ronci, as modified by Grandi, with the oil circulation line, filter, pump and heater taught by Nett, in order to provide a continuous supply of fresh oil to the vat.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Grandi and Moore et al. are cited for their disclosure of the state of the art.
